OneNote: one place for all of your notes

Sync to OneDrive

Share with anyone
on PC, phone, or tablet

[Watch the
2 minute video](#)

1. Take notes anywhere on the page

Write your name here

2. Get organized
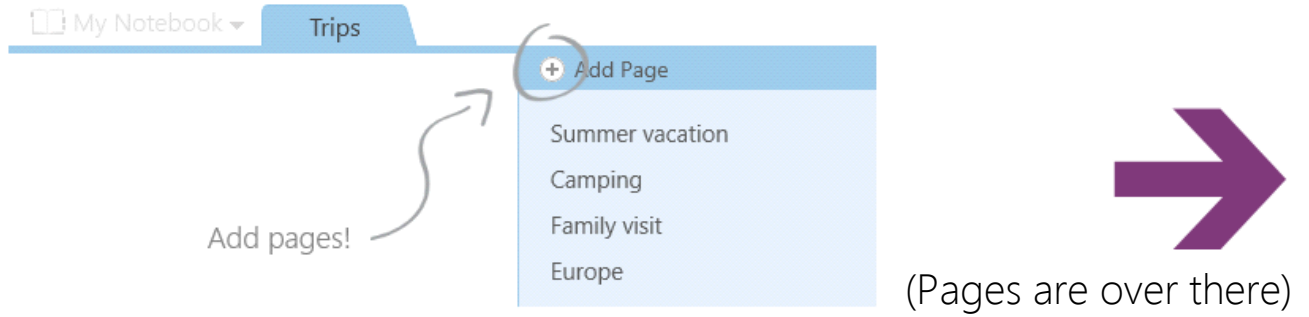

You start with "My Notebook" - everything lives in here

My
Notebook

Add sections for activities like:

My Notebook ▾ | Trips | Recipes | Shopping | To-Do | +

Add sections!

Add pages inside of each section:

My Notebook ▾ | Trips

⊕ Add Page

My Notebook ▾   **Trips**

⊕ Add Page

Summer vacation
Camping
Family visit
Europe

Add pages!

(Pages are over there)

3. For more tips, check out 30 second videos

▶ [Clip from the web](#)

▶ [Plan a trip with others](#)

▶ [Search notes instantly](#)

▶ [Write notes on slides](#)

4. Create your first page

You're in the Quick Notes section - use it for random notes

My Notebook ▾   **Quick Notes**

⊕ Add Page

Add your first page!

OneNote Basics

To-do lists

Shopping list
- ☑ Milk
- ☐ Oranges
- ☐ Potatoes
- ☑ Bread
- ☐ Cereal
- ☑ Sugar

Priorities
- ☐ Check messages
- ★ Call Dave
- ? Follow up with Jim
- ☑ Schedule appt.
- ☐ Call Janet
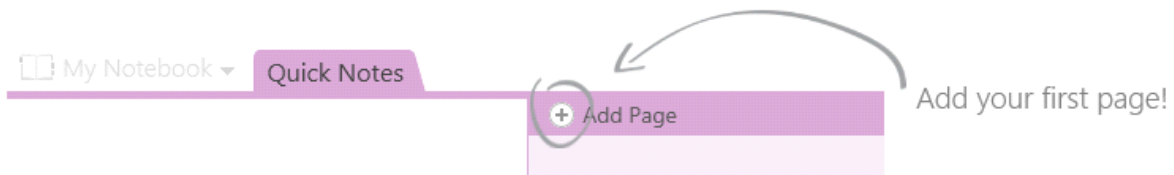

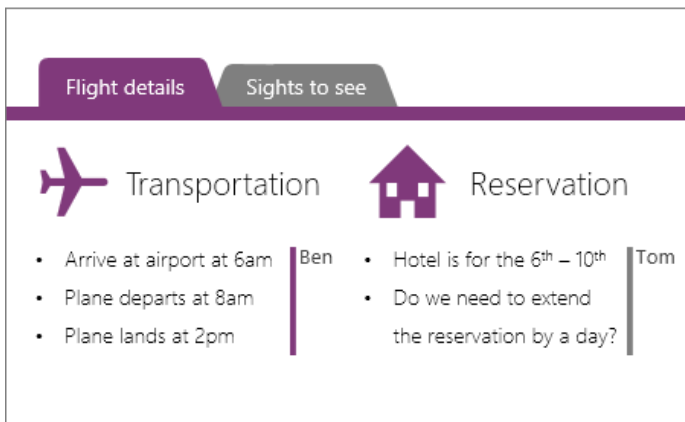

Remember everything

▹ Add Tags to any notes
▹ Make checklists and to-do lists
▹ Create your own custom tags

HOME → To Do Tag

Flight details   Sights to see

✈ Transportation
- Arrive at airport at 6am
- Plane departs at 8am
- Plane lands at 2pm

Ben

🏠 Reservation
- Hotel is for the 6th – 10th
- Do we need to extend the reservation by a day?

Tom

## Collaborate with others

▹ Keep your notebooks on OneDrive
▹ Share with friends and family
▹ Anyone can edit in a browser

FILE → New / Share
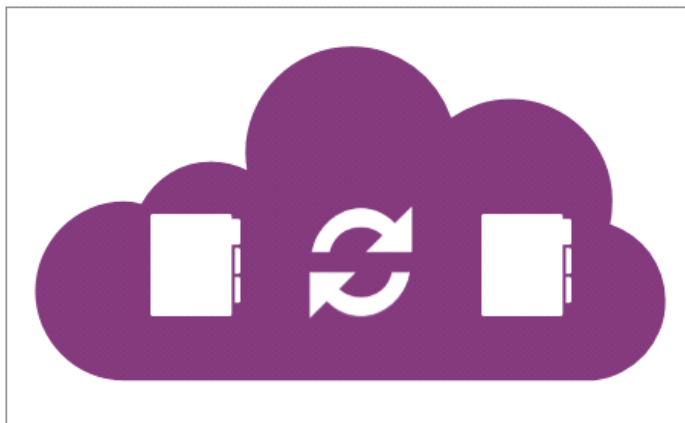

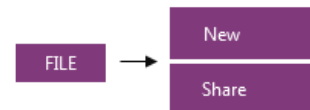

Keep everything in sync

▹ People can edit pages at the same time
▹ Real-Time Sync on the same page
▹ Everything stored in the cloud
▹ Accessible from any device

Clip from the web

▸ Quickly clip anything on your screen
▸ Take screenshots of products online
▸ Save important news articles

in your taskbar

OR

+ S on your keyboard

Organize with tables

▸ Type, then press TAB to create a table
▸ Quickly sort and shade tables
▸ Convert tables to Excel spreadsheets

TABLE TOOLS
LAYOUT

Shading   Sort   Convert to Excel Spreadsheet

Sunday retreat	Attending?	Overnight?	Vegetarian?
Chris	Yes	Yes	No
Molly	No	No	No
Peter	Yes	No	Yes
Samuel	Yes	Yes	Yes
Stacy	Yes	No	No
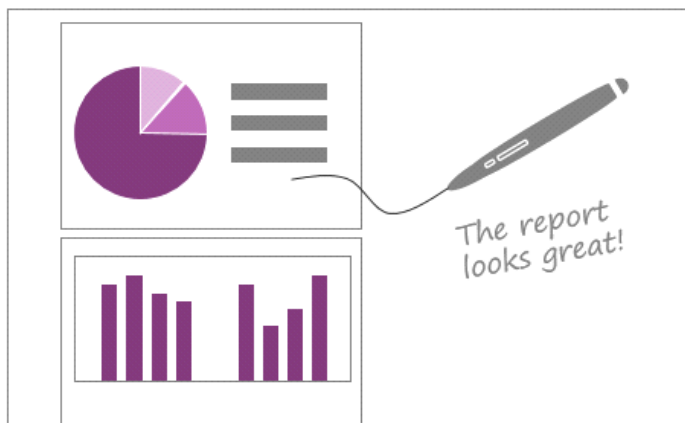

Write notes on slides

▸ Send PowerPoint or Word docs to OneNote
▸ Annotate with a stylus on your tablet
▸ Highlight and finger-paint

The report looks great!

in your taskbar

OR

+ N on your keyboard
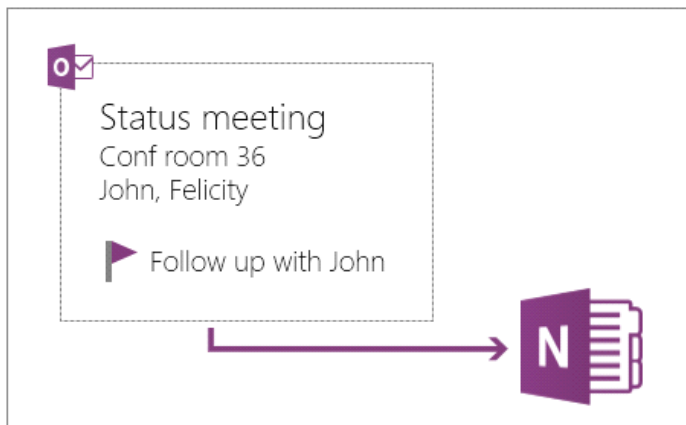

Integrate with Outlook

▹ Take notes on Outlook or Lync meetings
▹ Insert meeting details
▹ Add Outlook tasks from OneNote
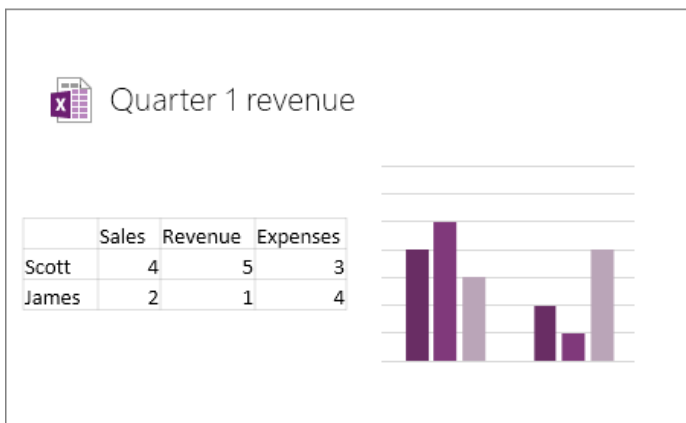

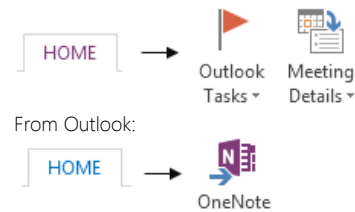

Add Excel spreadsheets

▹ Track finances, budgets, & more
▹ Preview updates on the page
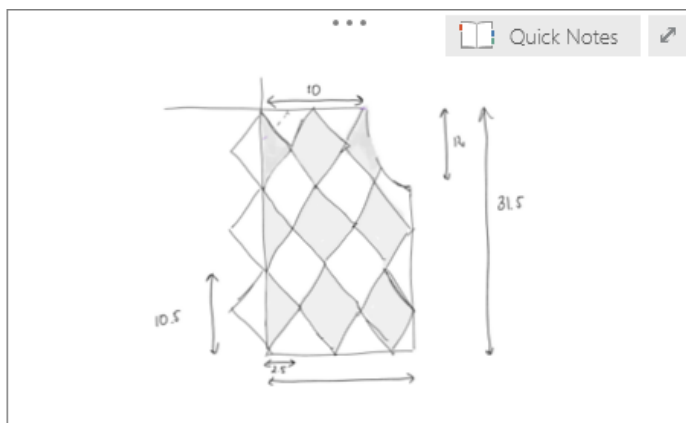

Brainstorm without clutter

▹ Hide everything but the essentials
▹ Extra space to focus on your notes

Don't forget to buy milk on the way home!

8:00 PM
7/25/2012
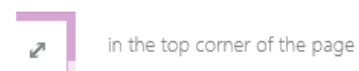

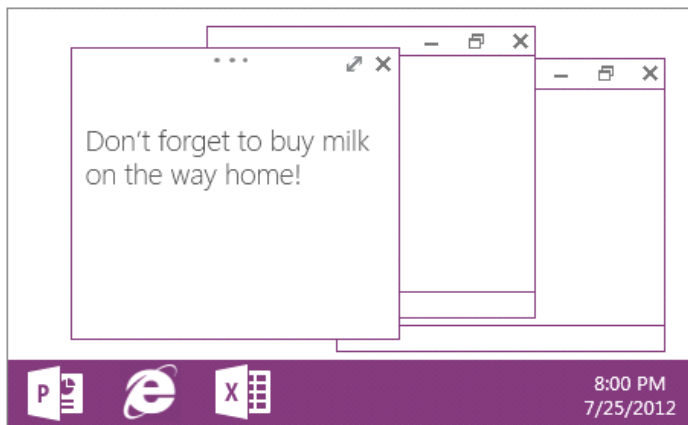

Take quick notes

▹ Quickly jot down thoughts and ideas
▹ They go into your Quick Notes section

in your taskbar

OR

+ N on your keyboard

Excel

Movi bridge dail in tips

TMOUT=9999999999999999999999999999

- <u>Dialing Instruction</u>

A.   Direct Dialing

For all HSBC communication tools (e.g. Movi, IP Phone, Jabber) and Cisco Video Endpoints

    1.   Dial **6 + Call ID** e.g. 6701234

B.   Alternatively if direct dialing is not accessible, then try IVR (*7)

For all HSBC communication tools (e.g. Movi, IP Phone, Jabber) and Cisco Video Endpoints

    1.   Dial ***7** and wait for the greeting **"Welcome to Cisco Meeting..."**
    2.   Enter **Call ID** followed by **#** either via in-app keypad or PC keyboard

* For Movi, the keypad ▦ can be found in the top right corner of the video window

* For Jabber, the keypad ▦ can be found in the bottom of the video window

W01STF_STAF_HIST

Firstly, I found a summary of all SPM documentation file:///G:\PRJ\RM%20Platform%20v2.0\007%20Development\Wealth_S11\Documentation\SPM%20Key%20Doucment%20Index.xlsx, which is helpful for you to understand how many SPM documentation should be inputted.

1. In the documentation table design, file:///G:\PRJ\RM%20Platform%20v2.0\007%20Development\Wealth_S11\Documentation\SPM%20Table%20Design.xlsx,

838	52 v2.5.9	W01SPM_LF_CC_LINKING	Temp table. For GDC ARM map input					
839		SUP_EMPLY_NUM	Supporter/ARM/PRO Emp Number	Y		N	CHAR	8
840		EMPLY_NUM	Emp Number	Y		N	CHAR	8
841		START_DATE	Support pair start date	Y		N	DATE	
842		END_DATE	Support pair end date				DATE	

Since we add the new column "Remarks" in the GDC cclinking csv file before, the corresponding loading table should also have the column "Remarks"

2. In the documentation table design, file:///G:\PRJ\RM%20Platform%20v2.0\007%20Development\Wealth_S11\Documentation\SPM%20Input%20and%20Output%20Checklist.xlsx
a. I think the DDL of tables W01SPM_CS_TABLE_BATCH_DT and W01SPM_ADT_TBL_WTCH_CFIG don't need to be changed, but the content of these two tables W01SPM_CS_TABLE_BATCH_DT and W01SPM_ADT_TBL_WTCH_CFIG are updated for waiting (table watcher) for IBIS table.

b. Since there should be Control-M change for RMP CR#69 RM/ARM & RM/PRO Pairing, please kindly input "Control_M setup of SPM_v2.0.xls " and which control-m xml file under RTC: \Source\Control-M\Control-M XML\ is updated.
c. Since we add the new column "Remarks" in the GDC cclinking csv file before, please kindly input under RTC: \Source\GDC\Site \Category\Staff\

SPM_BI_v2.5.8 ▸ Source ▸ GDC ▸ Site ▸ Category ▸ Staff

	Name	Date modified	Type	Size
	TPLimr_ctry_cde_staff_actv_trgt	5/31/2017 9:13 AM	SQL File	23 KB
	TPLimr_ctry_cde_staff_client_centre_link	5/31/2017 9:13 AM	SQL File	10 KB

3. The documentation "RMP - Data Feed Format Description" under RTC: \Documentation\Functional Spec\ is the agreed specification for RMP->SPM and SPM->RMP data files. It seems that this doc is still not yet updated for new data points for "Client - Entity Config Fields". Please kindly work with RMP team to update this doc and send back to us for documentation.

4. Meanwhile, there is another documentation "RMP DataFeed Transformation Design" under RTC: \Documentation\Functional Spec\ which is owned by SPM to record down the layout and extracting tables for SPMtoRMP data feed file.

PSPMHK*

4.2   Severity

A job's severity will be determined by [Severity] in message text. It is in the following convention:
1 – Information
2 – Warn
3 – Immediate
4 – Major
5 – Critical

It is the expectation that the majority of alerts will be configured with the (default) severity of 3 (immediate). This setting allows a 15 minute period for support to acknowledge their xMatters notification, before Operations are presented with the alert to escalate the issue manually. A higher priority would present the alert to Operations simultaneously to the xMatters notification commencing and a lower one would result in no Primary Screen presentation/escalation at all.

4.3   Type

Alerts type will be determined by [Type] in message text. It is in the following convention:

Code	Type	'Translated' and appended by enrichment to an alert's detail as
F	NOTOK	"…. has failed"
S	Late Sub	"…. has not started"
T	Late Time	"…. is not complete"
O	Over Run	"…. is over running"
U	Under Run	"…. has under run"
B	BIM	"…. is predicted to miss its SLA"
L	SLA	"…. has breached its SLA"
K	OK	exceptional free format (INFO – not ECS) shout text, which can be used to drive specific functionality (e.g. Blackouts).
C	Custom	"… detected <BID>".

I am updating the content of JIRA story GR-2707 for development the Cognos report with importing excel format and enable email sending for PRO/ARM pairing data.

Secondly, there is another story GR-2701 for release preparation for AMH SPM / client center enhancement in Aug. We will have a followup meeting next week with Anson and Isla to clarify how to start the release preparation work.
